

## Cycle 3 (02/27 - 03/24) Change Log

### BT Tech 🤖 Team Summary:

- 10 💡 Features Added
- 5 🐛 Bugs Squashed
- Some Highlights:
  - Added customization option to client personal pronouns. If “other” is selected under Personal Pronouns, a text-field will pop up to collect more information.
  - Updated the information collected on work life tasks. These templates populate in the details sections of a task when a task type is selected.
  - Added custom authorization forms and emails for clients placed with Tina Kinard. This will consolidate the emails going to Tina with client information, authorization forms, and the date/time of the appointment.

### Feature Improvements/Additions:

- Updated the information collected on work life tasks. The template populates in the details section of a task when the task type is selected.
- Added personal pronouns to the Create/Search Case dropdown, and added the ability to input custom pronouns for clients.
- Added ability for CC counselors to schedule with themselves indefinitely into the future.
- Added MIT Retirees as a benefit type for benefits on MIT.
- Added link to arrows plan on organization pages, and added hourglass animation to signify whether an organization is going through the implementation process.
- Added custom authorization form and mailers for clients placed with Tina Kinard.
- Added a client’s organization’s SAP details onto intakes and manager consults.
- Updated issue detail so that it automatically pops up when an issue that goes with an issue detail is selected.
- Added new MIT logo and disclaimer on the research portal.
- Added cherry blossom animation to the login page

### Bug Fixes:

- Fixed bug that was causing addresses on provider profiles to become overwritten.
- Fixed bug that was causing options for research tags to display differently between creating and editing a research note.
- Fixed bug that caused all CC placement emails to BCH clients to have Carol Biebers as the counselor.

- Fixed bugs that were preventing records of sessions from being created when scheduling clients in the CC.
- Updated Big Top so that intake issues always display.
